(2024-2025)

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
S. R. K. R ENGINEERING COLLEGE BHIMAVARAM**

CERTIFICATE

This is to certify that this is a Bonafide work on “**ONLINE LEARNING WEBSITE**” for and has been submitted by Ms. SD. Nasren(**23B91A4799**), T. Keerthi(**23B91A47A0**), V. Sai Deepika (**23B91A47A7**) as a **Web Application Development Using Full Stack** laboratory report, in partial fulfilment of the requirements for the award of the Degree of Bachelor of Technology in Computer Science and Engineering, during the academic year 2024-2025. The candidate worked right under my Supervision and guidance.

Lecturers In-Charge

CH. Raghuram
M. Sahaja
B. Rekha Madhavi
Department of CSE,
S.R.K.R. Engineering College,
Bhimavaram.

Head of the Department

Dr. B h. Rama Krishnam Raju
Head of the Department,
Department of CSE,
S.R.K.R. Engineering College,
Bhimavaram.

ACKNOWLEDGEMENT

I take immense pleasure in expressing my heartfelt gratitude to Dr. K. V. Murali Krishna Raju, beloved Principal of S.R.K.R. Engineering College, Bhimavaram, and Dr. B. Rama Krishnam Raju, esteemed Head of the Department (C.S.E), for granting me the opportunity to carry out this mini project titled “Web Application Development Using Full Stack”.

I am especially thankful to my project guide, Sri Ch. Raghuram, Assistant Professor, for his valuable guidance, consistent support, and insightful suggestions throughout the course of this project. I also wish to express my sincere thanks to Smt. M. Sahaja, Smt. B. Rekha Madhavi, Assistant Professors, for their encouragement and timely assistance which greatly contributed to the successful completion of the project.

Finally, I would like to extend my deep gratitude to my beloved parents, faculty, and friends/classmates for their constant support, motivation, and encouragement throughout this journey.

SD. NASREN (23B91A4799)
T. KEERTHI (23B91A47A0)
V. SAI DEEPIKA (23B91A47A7)

ABSTRACT

This project presents the design and development of an **online learning website** aimed at providing accessible, flexible, and interactive educational content for learners worldwide. The platform offers a wide range of courses across multiple domains, enabling users to register, enroll in courses, track progress, and receive certifications upon completion. Key features include video lectures, downloadable resources, quizzes, forums for discussion, and real-time progress tracking. The system is built using modern web technologies to ensure a responsive and user-friendly interface. Additionally, the platform supports role-based access for students, instructors, and administrators, each with tailored dashboards. This project not only promotes self-paced learning but also integrates intelligent scheduling and personalized recommendations to enhance user engagement and learning outcomes. The website is designed to be scalable, secure, and easily maintainable, making it a robust solution for digital education in the modern era.

INTRODUCTION

In today's digital era, online learning has become a vital tool for education, offering flexibility, accessibility, and a wide range of resources to learners around the world. This project focuses on developing an online learning website designed to bridge the gap between students and quality education by providing an interactive and user-friendly platform. The website enables users to access a variety of courses from different domains, complete with video lectures, notes, quizzes, and certification upon completion.

The platform supports multiple user roles such as students, instructors, and administrators, each with specific functionalities tailored to their needs. It also integrates smart features such as AI-based learning schedule recommendations and real-time progress tracking to enhance the user experience. By leveraging modern web technologies and scalable backend infrastructure, this website aims to create an efficient, reliable, and engaging environment for both teaching and learning.

MODULES

1. HOME PAGE
2. LOGIN PAGE
3. COURSE PAGE
4. BLOG PAGE
5. CONTACT PAGE
6. INDEX PAGE

SOFTWARE REQUIREMENTS

1. Text Editor: Visual Studio Code, Notepad
2. Front End: HTML, CSS, JAVASCRIPT
3. Internet Browser: Google Chrome/Mozilla Firefox/Internet Browser

HARDWARE REQUIREMENTS

1. Processor-Intel Core I5
2. RAM-8GB

TECHNICAL STACK

HTML (Hyper Text Markup Language)

HTML is the backbone of the website, used to structure all the content. It defines elements like headings, paragraphs, links, images, videos, and forms. In the learning website, HTML builds the layout of pages like the homepage, courses, login, and contact pages.

CSS (Cascading Style Sheets)

CSS is used to style the HTML content and make the website visually appealing. It controls colors, fonts, spacing, layout design, and responsiveness. For example, CSS styles the course cards, buttons, navigation bar, and ensures the website looks good on all devices.

JavaScript

JavaScript adds interactivity and dynamic behavior to the website. It handles tasks like form validation, toggling menus, interactive elements, and future features like scheduling or progress tracking. In the learning site, JavaScript can enhance the user experience by enabling real-time updates and smooth navigation.

SCREENSHOTS

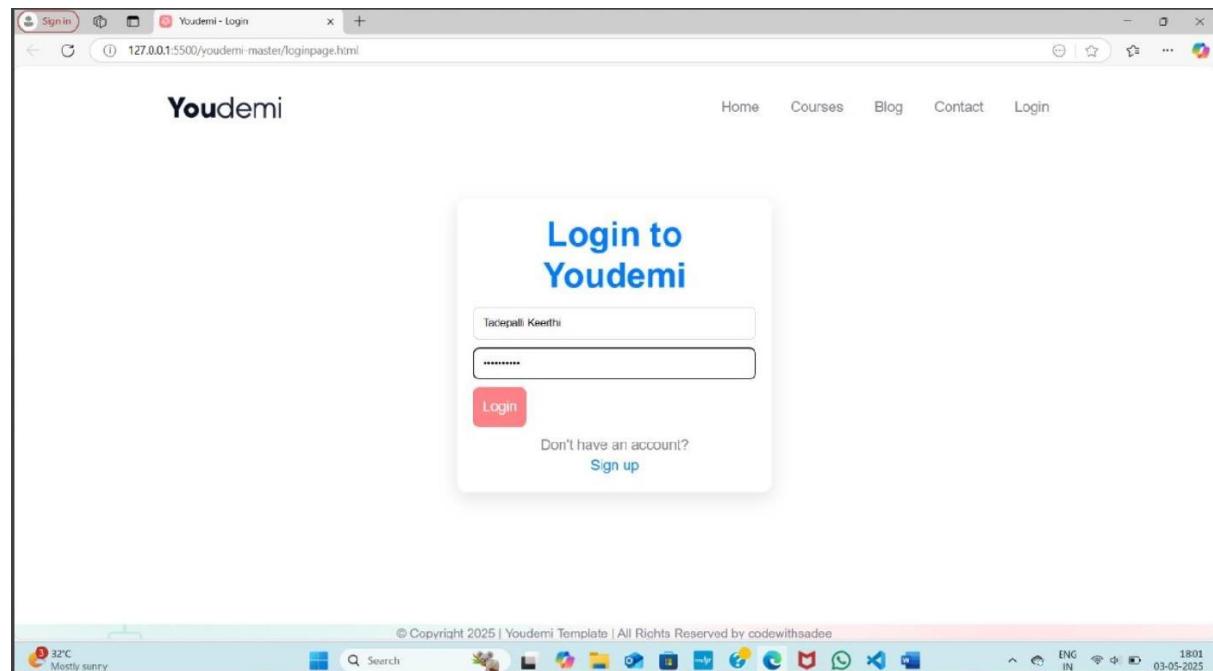

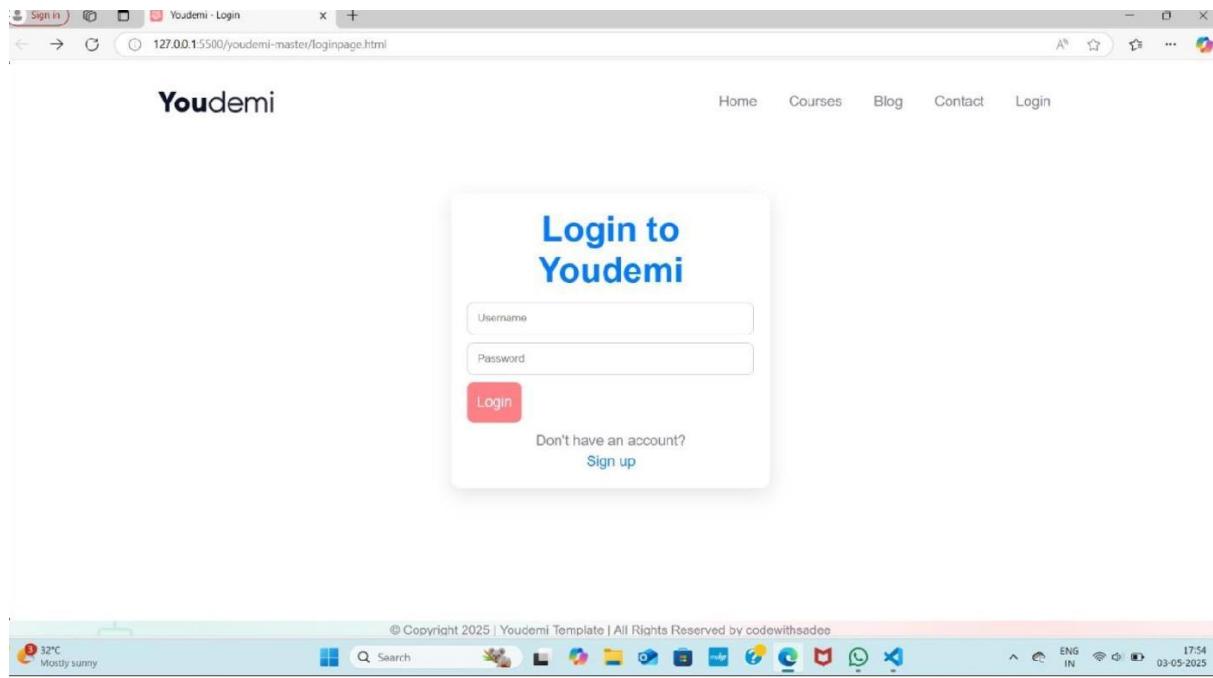

1. Home page

Description:

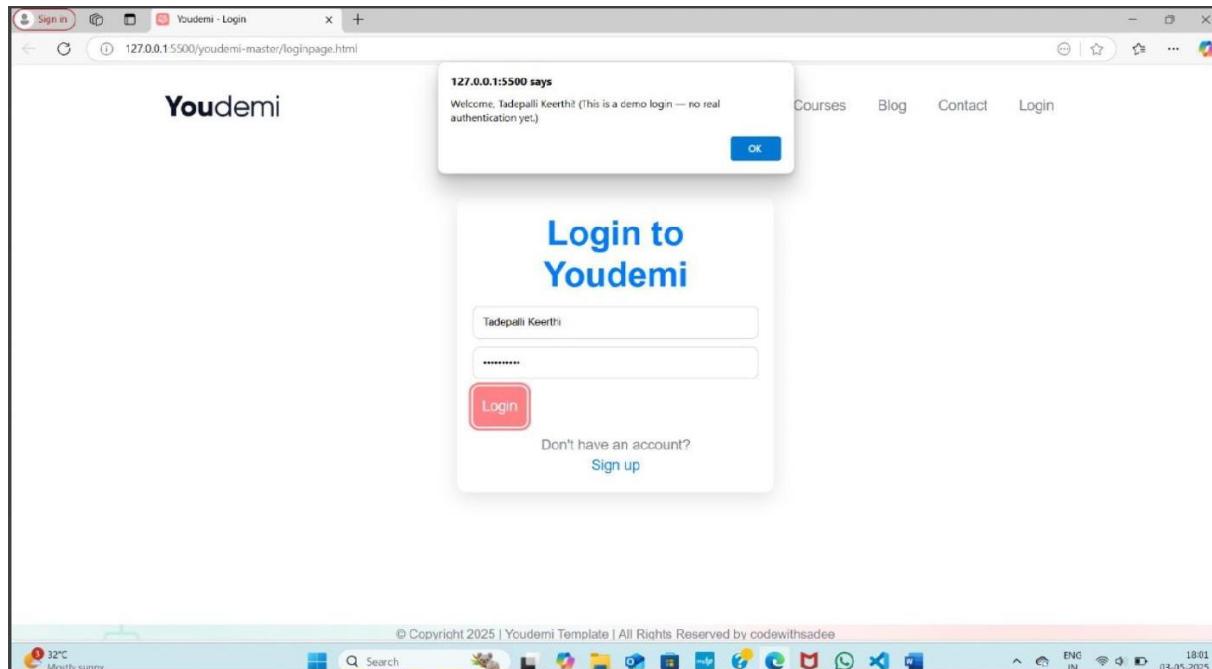

The Home Page of the online learning website serves as the welcoming interface, featuring a simple and clean navigation bar with links to essential sections. It introduces the platform with a greeting message, creating a user-friendly starting point for learners.

2.Login page

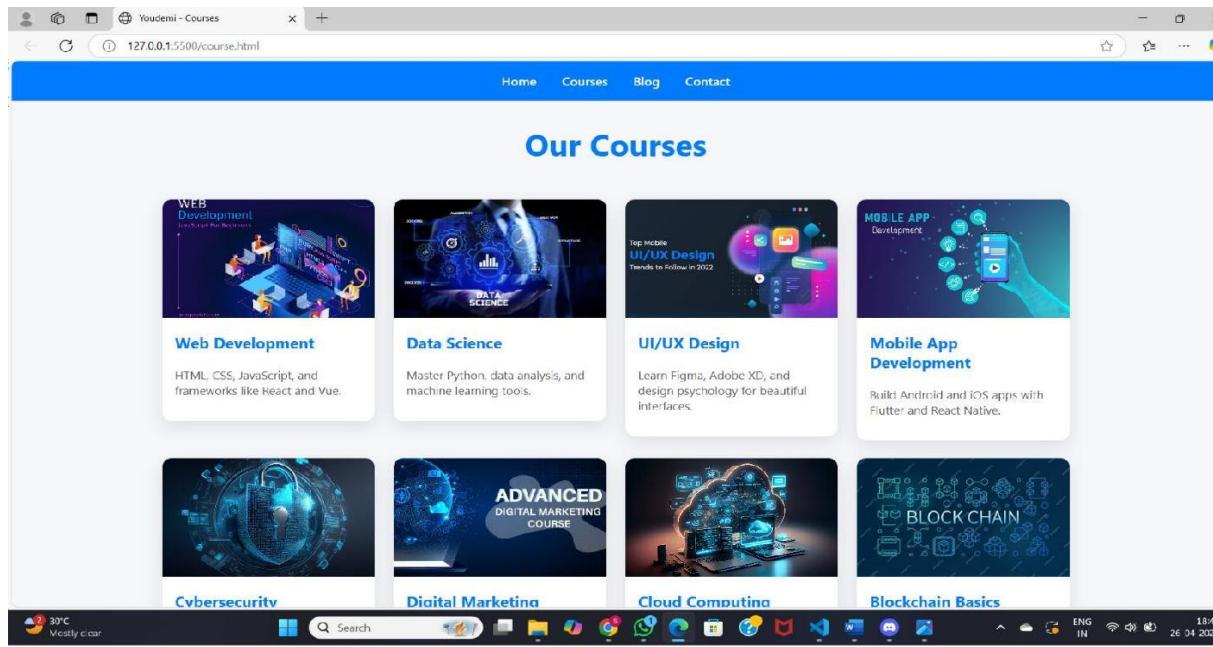

Description:

The Login Page allows registered users to securely access their accounts by entering valid credentials. It ensures user authentication and redirects them to their respective dashboards based on their role (student, instructor, or admin).

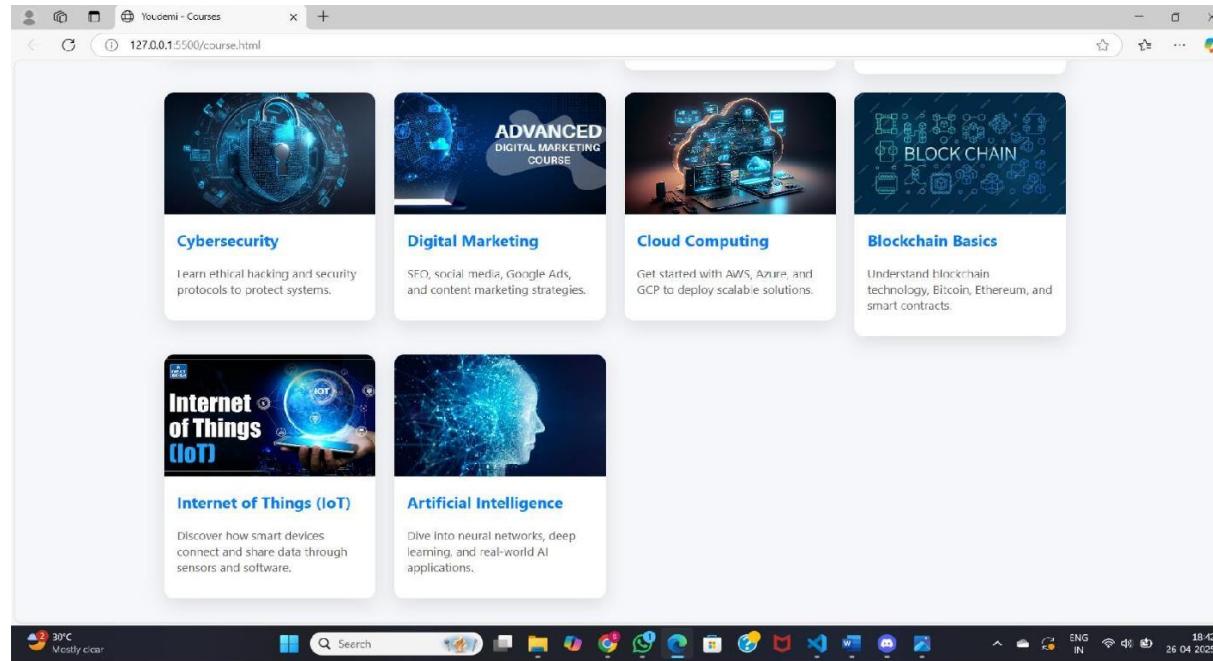

3.Course page

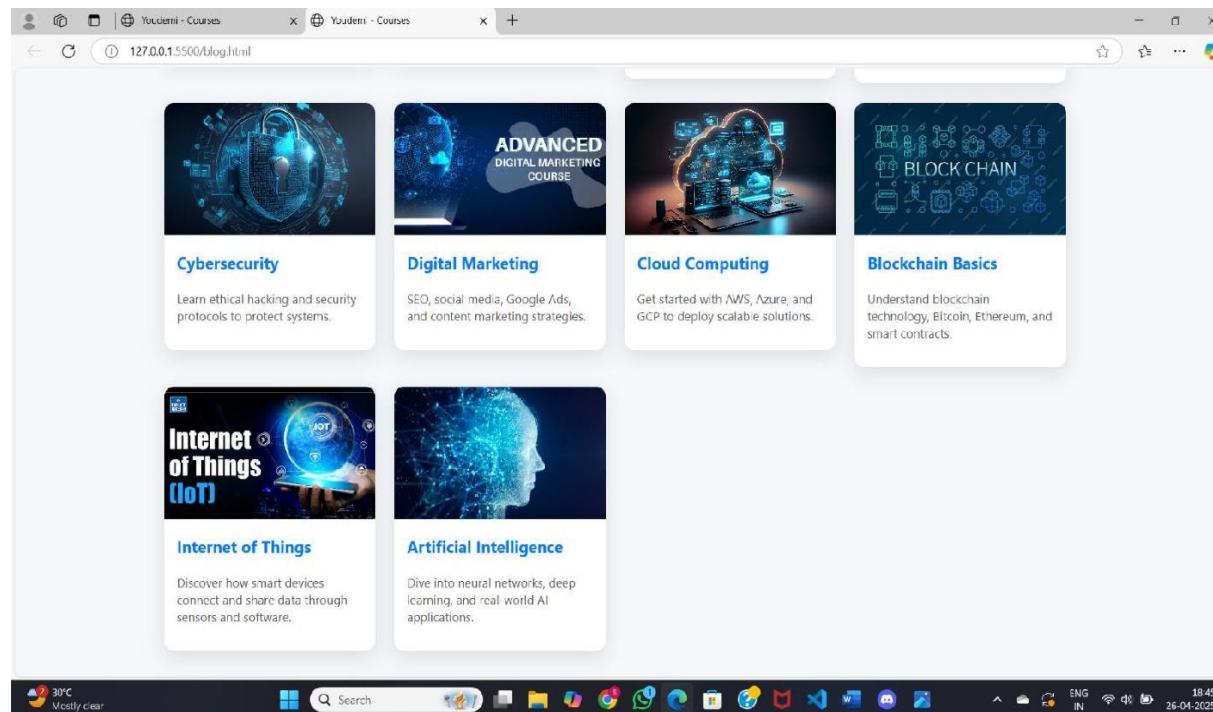

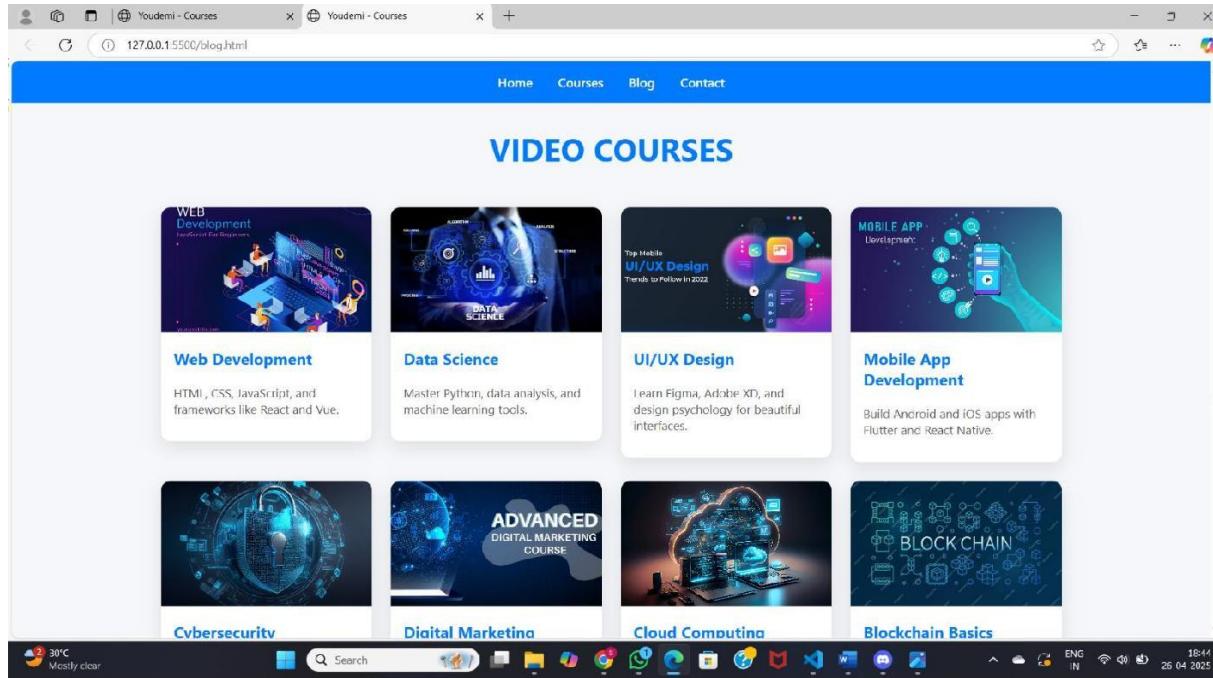

Description:

The Courses Page displays a list of available courses categorized by subject or skill level. Users can browse, view course details, and enroll in their desire to begin learning.

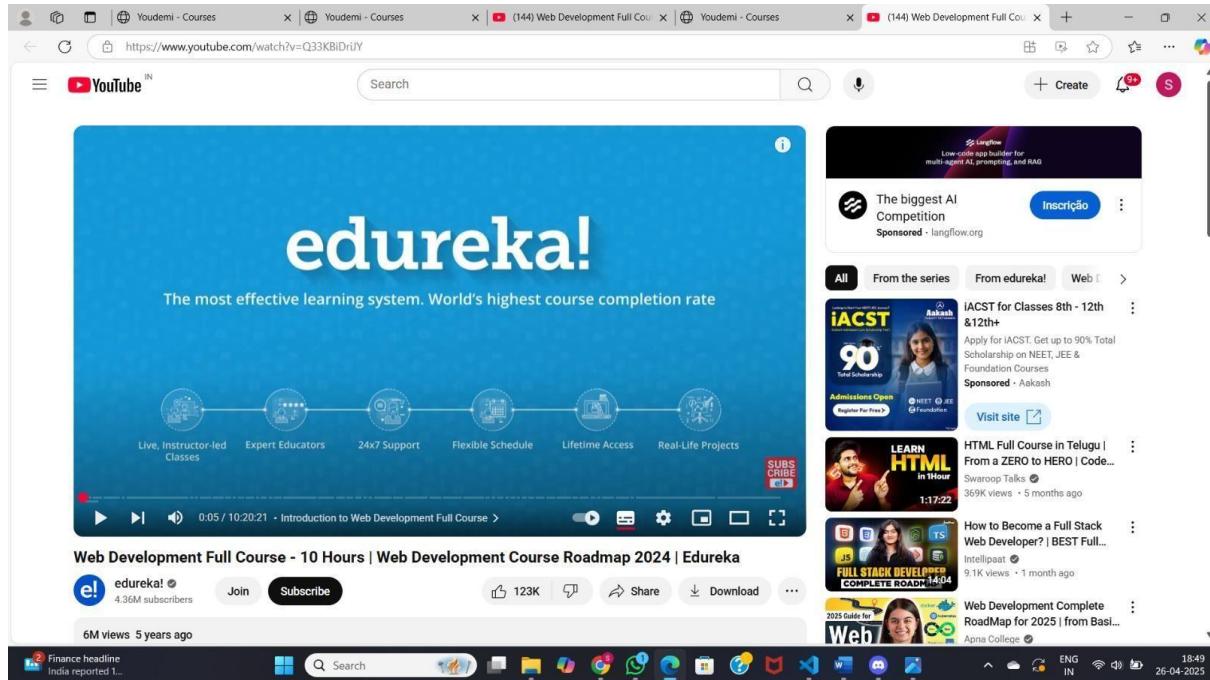

4.Blog page

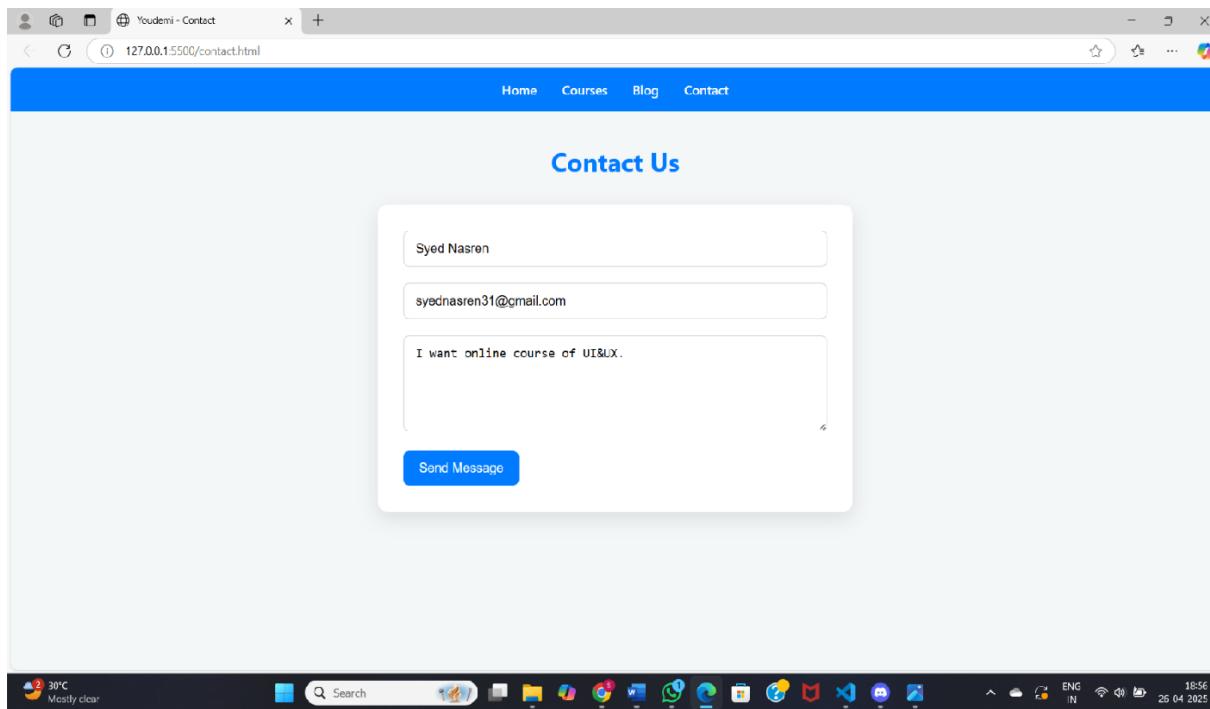

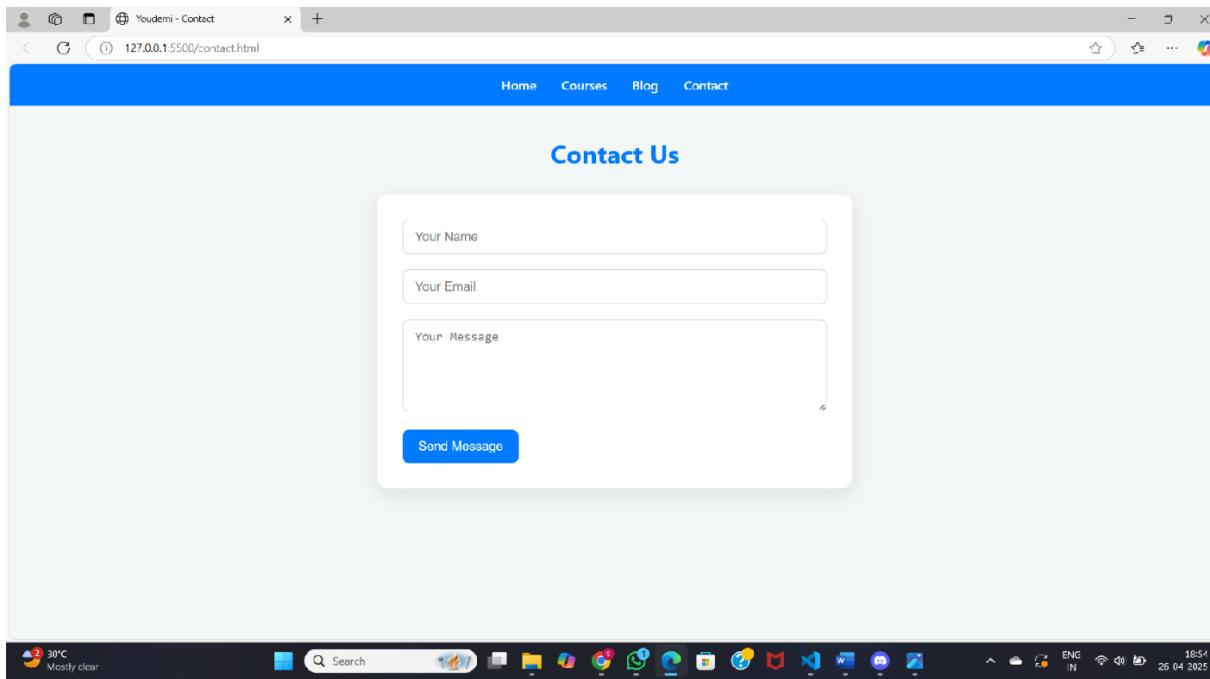

Description:

The Blog Page features articles, updates, and educational content related to various topics. It helps users stay informed about new trends, learning tips, and platform announcements.

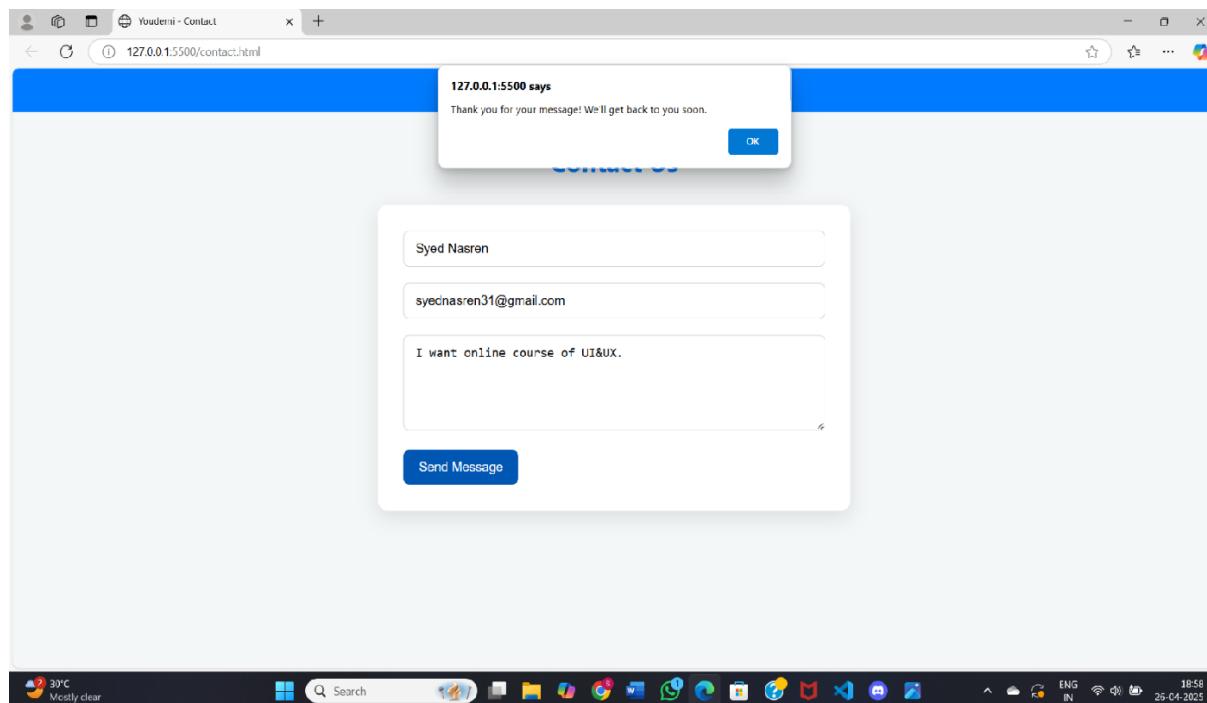

5.Contact page

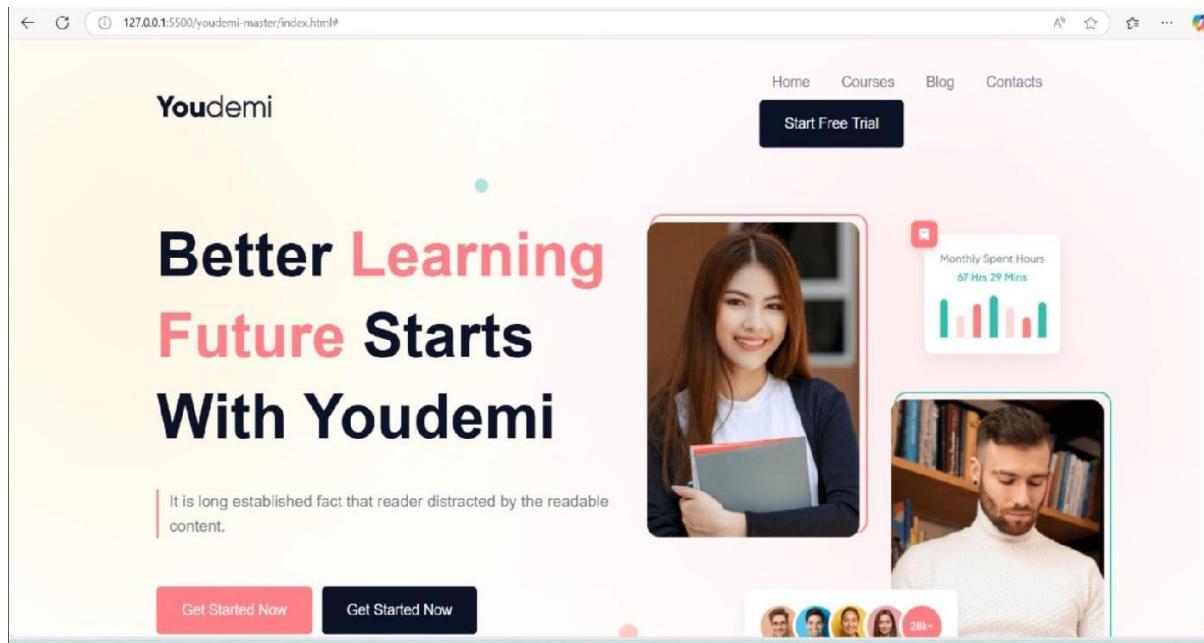

Description:

The Contact Page provides users with a way to reach out to the website administrators or support team. It typically includes a contact form, email address, and other relevant details for communication and feedback.

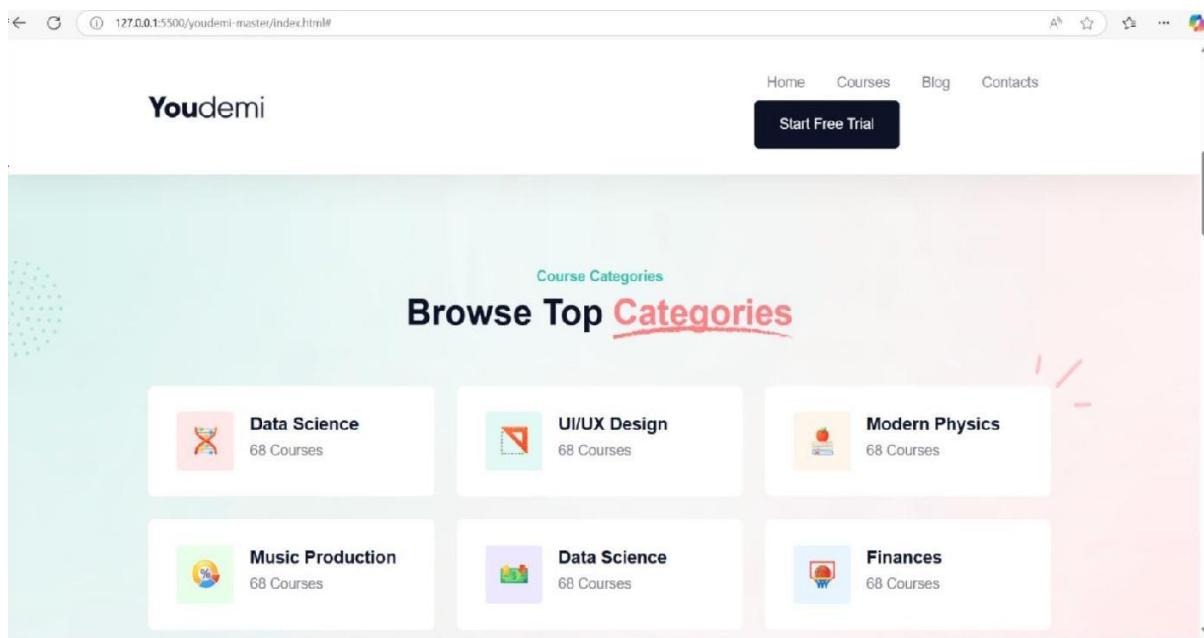

6.Index page

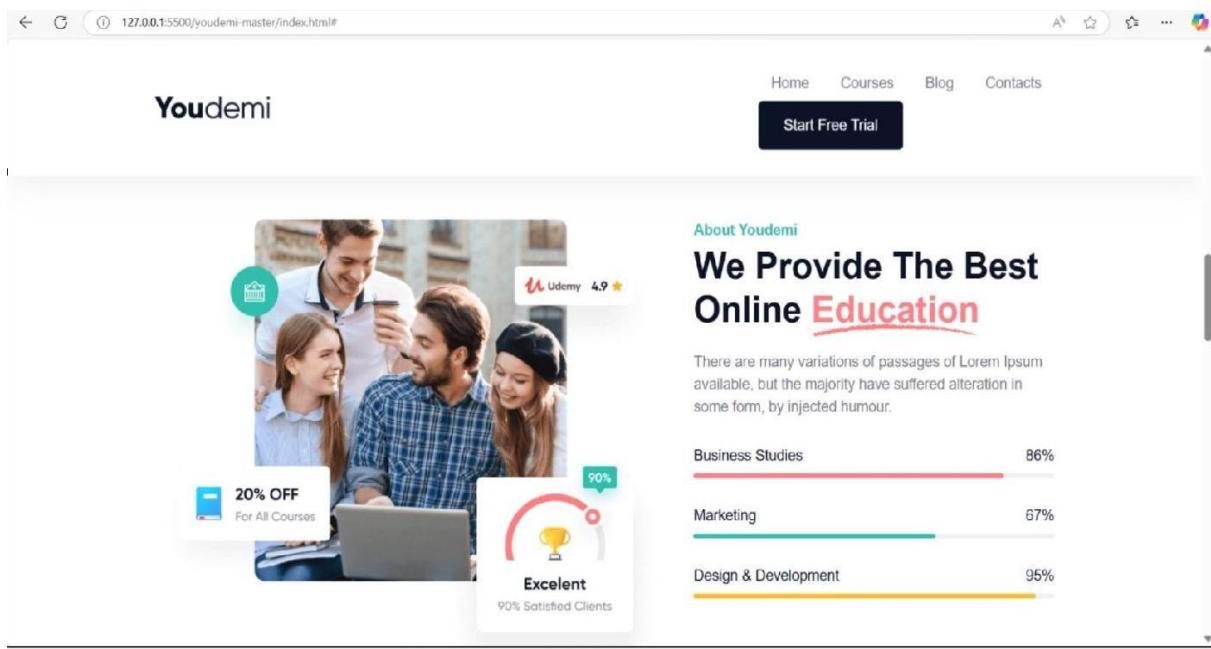

Description:

The Index Page serves as the main entry point to the website. It provides an overview of what the platform offers to users.

Description:

A welcoming message greets visitors with a clear call to action. The navigation bar allows users to access key sections like Courses, Blog, and Contact.
